COMPUTING STUDENT

Nimesh Dangi

I'm Nimesh Dangi, a computing enthusiast born on December 1, 2002. With a solid foundation from Eden National Boarding School (class 10 in 2073 BS) and advanced studies completed in 2078, I'm now pursuing a bachelor's degree in computing. I thrive on challenges and am dedicated to lifelong learning, demonstrated through my hobbies of coin collection and reading. Alongside my passion for technology, these interests reflect my analytical skills and curiosity about the world's history and narratives. Living with a small, dedicated family, including a sibling in the medical field, I value diverse perspectives and teamwork.

ACHIEVEMENTS

EDUCATION

Eden National Boarding School

Insight Vision Higher Secondary School

BSC.Hons.Computing
Islington College / kathmandu / February, 2022 - Present

I'm fortunate to study at Islington College, a hub for IT enthusiasts keen on honing skills-in computing, multimedia, and networking. This institution is renowned for its valuable curriculum that thoroughly prepares students for the IT industry.

PROJECTS

Ecommerce Website:GetTree

I played a pivotal role in bringing this project to fruition, taking charge of the overall design, focusing primarily on JavaScript development, and single-handedly creating the portfolio section.

NASA International Space Apps challenge

My primary contributions to the project centered around its design and development phases, utilizing Tailwind CSS for styling and JSON for data management to successfully complete the project.
